How to Successfully Clear Out a Hoarder's Apartment

5 Steps for a Clean Apartment.

Step 1:

Get an Overview

First, get an overview of the situation:

- How many rooms are affected?
- How cluttered are the rooms?
- What types of waste and rubbish do you find?

Step 2:

Order a Container

Ideally, order a container online from a waste disposal service, e.g.,

- www.abfallserviceonline.at,
- www.odpadonline.sk or
- www.serwisodpadowy.pl

Place it near the building. The best option is if the waste can be thrown directly from the window into the container. If you order a container, you must register it with the relevant authority.

Step 3:

Proceed Step by Step

- Secure personal items such as important documents or valuables right at the beginning.
- 2. Remove bulky items first to create space.

Step 4:

Sort the Waste

Sort the waste in advance and then dispose of it either collectively in the container or, in the case of hazardous waste, at the appropriate facilities.

Step 5:

Clean and Disinfect the Apartment

Once the apartment is empty, you have achieved a major milestone. Depending on the assignment or the wishes of the affected person, the apartment can then be cleaned and disinfected.
