Business Waste Solution

Bussiness waste solution

Our services for industrial clients

We offer complex waste management solutions to companies of any size and from industry sectors ranging from; automotive, railway, airport, pharmacy to agriculture. Our services encompass; consulting, transportation, facility services and complex waste management concepts.

Main references in the industry sector:

ABB, Steyr Daimler Puch, Volkswagen, Austrian Railways, Bosch, Diesel, Siemens, Infineon, Alston, Miele Technika s.r.o. and Škoda Auto a.s., Hyundai Motor Manufacturing Czech, s.r.o., Kostecké uzeniny a.s. and many more.

Our services for commercial & retail clients

A strong and reliable partner, our portfolio for commercial and retail customers includes a wide range of waste management services, deploying state-of-the-art technology.

Providing customized solutions to suit individual customer needs, our team at FCC Environment CEE starts with individual and professional consulting, where we analyze and develop concepts for all business-internal waste processes like; waste collection and transport, separation, sorting and recycling, as well as facility cleaning services.

Main references in the industry sector:

Ahold, Globus, Tesco, Billa, Metro, Ikea, OBI and many more.

Our services

54.000
industrial and retail clients

7
countries

3.818
thousand tons collected p.a.

Waste and Resource Management

- Waste collection and transports
- Container and skip hire
- Waste processing, resource recovery and disposal (including hazardous waste)

Facility services

- Indoor and outdoor cleaning services
- Construction site services
- Park and greenery maintenance
- Clearances
- Secure disposal of documents and data storage mediums

Consulting

- Development of customized waste management solutions
- Waste declaration, collation of statistics

Our benefits

- Transfer of responsibilities for waste and resource management
- Application of a tested system (in Czech certified according to ISO 9001, 14001 and 18001 standards)
- Investing in a third person to waste management, applying new trends (handling technology, pressing technology ...), the client doesn't have to invest, only paying a lump sum of equipment rental
- The client doesn't need to organize employees for handling waste, only paying for the service as a whole
- Reduction of risks of recourse from state administration bodies
- Co-operation with a single business partner
- Stabilisation of prices
- Legislative purity

About FCC

FCC Environment CEE – proven resource management and citizen services in Central and Southeastern Europe.

FCC Environment CEE is a leading sustainable waste management company in Central and South East Europe. Following our mission „Service for the Future” we aim to minimize waste and transform it into a valuable resource. By reducing the environmental burden, we help to secure a good quality of life for present and future generations.

Our extensive experience and expertise, our proven service quality and deployment of state-of-the-art green technologies makes us a reliable partner for municipalities, business, industry, commerce and domestic households alike.
